

Compass

Ambidextrous Treatment Centres

Compass delivery options :

Unrivalled console mobility and Compass's determined versatility bring all the benefits of convenience, flexibility, efficiency and Patient comfort.

Belmont's base-mounted delivery system design is an understated advancement in dentistry and Patient care.

Ambidextrous capability across the range doubles the qualification of Compass in any configuration to perform excellent service for any Operator and procedure.

COMPASS 'Surgery System' (Ambidextrous)
Air or Electric version

COMPASS 'Flexible Dr System' (Ambidextrous)
chair and Operator's console

COMPASS 'Flexible System' (Ambidextrous)
chair and cuspidor with Assistant's console

for better daily dentistry :

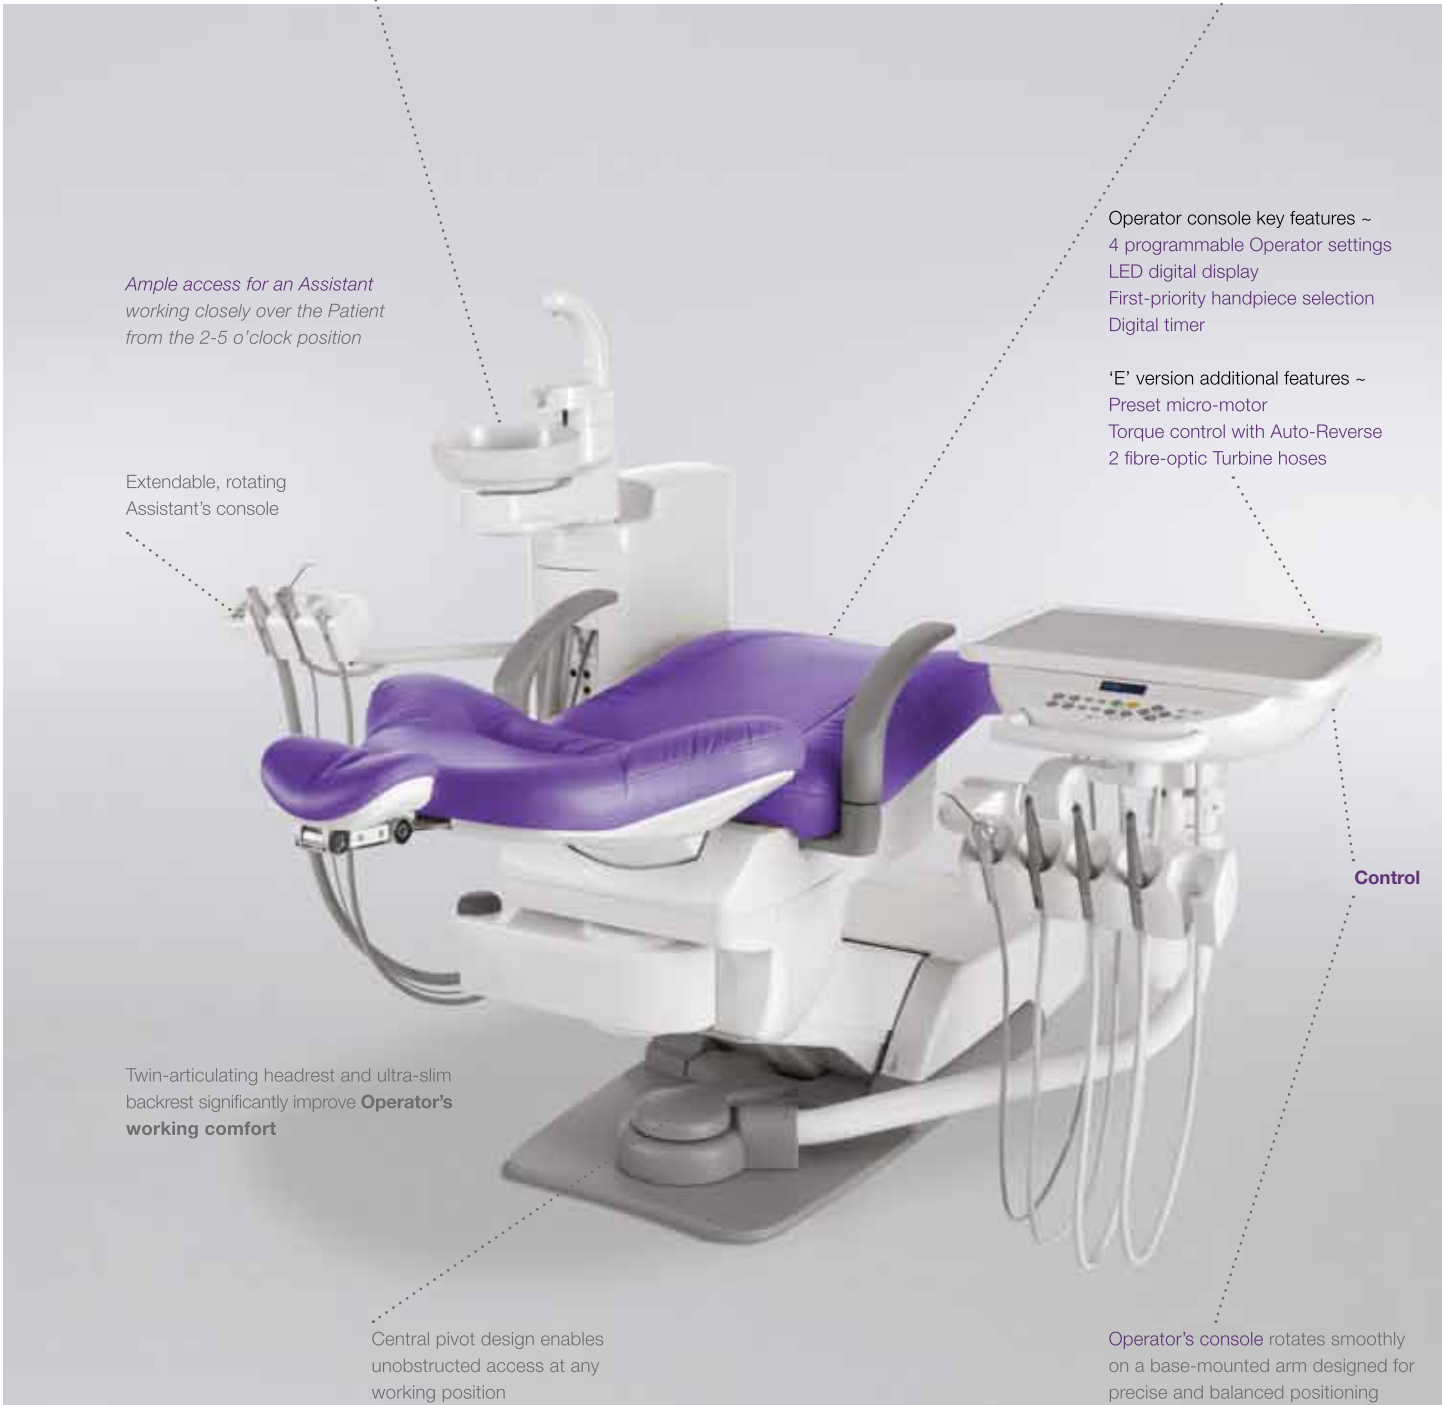

Compass

From an elegant, slim base-mounted arm comes a responsiveness which ensures Operators achieve comfortable working positions.

COMPASS 'Surgery System'

Rotating, porcelain spittoon bowl (colour options available)

Luxury upholstery (Special order item)

Control and discretion are the finest traits of the Compass delivery system. An intelligent delivery solution which seeks to conceal the instruments from Patient-view without comprising working comfort. Designed for uninterrupted dentistry in the most demanding surgery environments, Compass is pointing to the future.

Increased surgery efficiency & Patient access :

Base-mounted swing-arm delivery system provides the full range of Operator access

To improve efficiency and increase workflow are the key aims of the Compass treatment centre. Sheer mobility enables simultaneous tasks to be carried out, thus saving the Patient and surgery time.

comfort for all Dentists & Patients :

Compass

Correct ergonomics and smooth movements ensure that Compass is a pleasure to work with at any position.

COMPASS 'Surgery System'

Extensive access for Assistants working at 2-5 o'clock

Simultaneous preparation and consultation saves valuable working time between every Patient. The uniquely perfect clean and preparation arrangement to the rear of the chair also improves lines of communication between Operator and Assistant.

Comfortable single- and four-handed working positions with excellent versatility of the Operator's and Assistant's consoles.

60 second changeover from left- to right-side delivery, or vice versa requires no tools or expertise. The simple procedure results in identical conditions for left- and right-handed Operators.

Rear cover is easily removed/replaced without tools or expertise

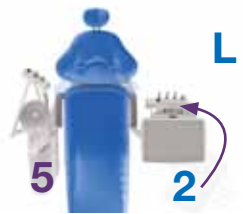

Right-handed set up.
Raise chair height and remove the rear cover.

Incline chair.
1-2. Swing table round to left side.

3-4. Swing cuspidor round to right side.

5. Secure cuspidor in position.
Secure cuspidor locking lever.
2. Rotate console.
Left-handed set up.
